STATEMENT ON THE USE OF GENERATIVE ARTIFICIAL INTELLIGENCE (GAI)

1. Please, indicate whether generative AI¹ tools were used in the writing process of the article.

YES ☒

NO ☐

2. If YES, please specify which IA tools were used (name and version) and for what tasks.

Claude (Sonnet 5 version) to review the writing and syntax of the text

3. Please confirm the following statements:

- ☒ All IA-generated content was revised and validated by the author/s, who take full responsibility for the manuscript.
- ☒ No sensitive, confidential or unpublished data were entered into generative IA tools.
- ☒ Generative IA tools were not used to create citations or references.
- ☒ [The journal's IA policy](#) is hereby acknowledged and accepted.

Santiago, 11 August 2026

Sebastián Henríquez San Martín

Sebastián H.

¹ Generative AI is understood as a type of artificial intelligence capable of creating original and realistic content (text, images, music, videos, software codes) when prompted or instructed by a user.
