

## **Editorial Note - volume 24 number 2 - year 2025**

The articles published in this issue of the EJS journal are expanded and revised versions of the best papers presented at the 53 Argentine Conference on Informatics (JAIIO), which were carefully evaluated and selected by the experts who make up the program committees.

The Argentine Computer Science Conference has been held since 1961, organized by the Argentine Society of Informatics (SADIO). They bring together researchers, students and professionals from academia, industry and government, both Argentine and foreign, with the aim of extending knowledge of the computer science discipline, stimulating links and promoting teaching, research and applications in this discipline. They are organized as a set of symposia, each dedicated to a specific topic.

On this occasion, the 53 JAIIO were co-organized by the Universidad Nacional del Sur (UNS) and took place from August 12 to 16, 2024 in the city of Bahía Blanca, province of Buenos Aires, Argentina. The general presidents were Dr. Rodrigo Santos (CONICET/UNS) and Dr. Claudia Pons (UNLP/UAI).

We express our special thanks to the presidents of the following symposia of the 53 JAIIO who collaborated in the selection and evaluation of the articles published in this edition of the EJS:
